Easimount® Vinyl Strip Curtain System
### Part Number: SA/LA#######

REQUIRED MATERIALS

- Easimount® Vinyl Strip Curtain System
- Drill with drill bits and Phillips head bit/screwdriver
- Marking instrument

1. Using the aluminum channel as a template, make sure channel is level and centered above opening. Bar height should allow strips to clear floor 1/4". Mark hole patterns with pencil (**Fig. 1**).

2. Drill holes and mount channel with proper fasteners. **Note:** For flush mount freezer doors, shim aluminum channel off jamb 1/4" to increase space between vinyl strips and freezer door. (see below)

3. Insert one end cap at either end of channel.

4. Insert strips through un-capped end of channel (**Fig. 2**).

5. After verifying that all strips are evenly placed and overlapping properly, insert other end cap and trim strips if needed for proper floor height (**Fig. 3**).

6. Optional: Insert self-tapping screws at each end of channel through last strip for added retention.
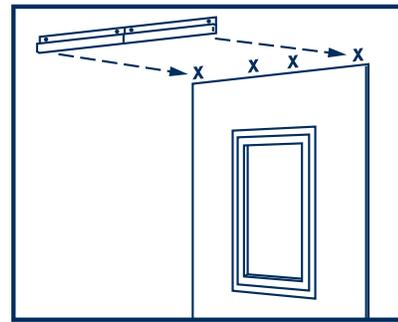

CLEANING

Clean vinyl curtains with soap and water on a regular basis. For stubborn stains use a 5% ethanol (Windex type product) and water. Wipe curtain and any residual fluid on floor dry.
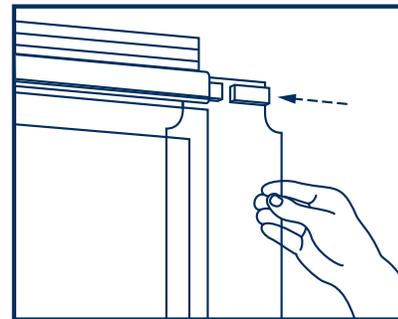

1/4"
(6,4 mm)
Shim

Shim 1/4" for freezer applications
